Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

- Claims 12-18, drawn to a first flex-based fuel cell, classified in class 429, subclass 12.
- II. Claims 19-22, drawn to a second flex-based fuel cell, classified in class429, subclass 34.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are directed to related fuel cells. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have a materially different design. For example, Group I requires a plurality of pores and a dry adhesive, which limitations are not part of Group II. In addition, Group II includes first means for supporting a liquid fuel converting means and a second means for supporting a proton conducting means, which features are not part of Group I. The two groups are thus not obvious variants. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Application/Control Number: 10/618,171

Art Unit: 1745

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Page 3

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant's election of Group I in the reply filed on 31 January 2007 is acknowledged. Because applicant did not distinctly and specifically point out the

Art Unit: 1745

supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

- 6. Claims 23 and 24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Thursday, 6:15-3:45, and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
